SU6 CANTILEVER UMBRELLA

FROM \$2,303.00 USD

UNIQUE FEATURES

- Manufactured from marine-grade powder-coated aluminium, stainless steel and other non-corrosive materials
- Durable, heavy-duty, multi canopy mounting (up to 4 canopies on one mast)
- Patented 'one movement' sliding system
- Octagon or square umbrellas
- Covers up to 38m²
- Utilises gas-strut technology for ease of deployment

Gas Strut

Thanks to the gas-strut, which compensates the weight of the umbrella, the SU6 Umbrella is ultra light to handle. For locations close to the sea, we recommend a stainless steel gas-strut option.

Quick-release sliding system

The patented 'one movement' sliding system enables the umbrella to be opened and closed easily in one single movement.

UP TO 4 CANOPIES ON 1 MAST

The Shadowspec SU6 Umbrella consists of 1,2,3 or 4 canopies on one mast.
You choose where you want shade or sun! This makes the SU6 Umbrella an ideal hospitality partner.
